Presenters

Clement Bonnet
Principal
Milliman

Clement Bonnet is a Principal in Milliman's Asia life consulting business, based in Hong Kong. Before joining Milliman in Hong Kong, Clement played a critical role in the expansion of the Paris office's R&D activities, working across a wide range of technical topics. Since moving to Asia, Clement has been managing numerous M&A and strategy projects performing work in various markets including Hong Kong, Thailand, Philippines, Vietnam, Indonesia, India and China. His more technical consulting projects include providing support in pricing more complex products, developing stochastic models, developing Asset Liability Management (ALM) models, designing strategic asset allocation frameworks, designing risk management frameworks (including risk appetite frameworks). He is also co-leading Milliman IFRS 17 activity across the region.

Scott Chow, FSA, CERA, FRM
Consulting Actuary
Milliman

Scott Chow is a Consulting Actuary in Milliman's Asia life consulting business, based in Hong Kong. Scott is a seasoned consultant with broad experience in different actuarial topics including but not limited to merger and acquisition, product development and pricing, product and distribution strategy, supporting appointed / independent actuary and risk-based capital related products. He has advised companies in different parts of Asia. He currently leads two working groups focusing on the developing Hong Kong Risk Based Capital framework and InsurTech respectively to enhance Milliman's service offerings in the region, and he is a frequent speaker in actuarial conferences on these two topics.

Nicholas Jessop
Head of Scenario Modelling Research for MA's Insurance & Pensions Business
Moody's Analytics

Nick is Head of Scenario Modelling Research for MA's Insurance & Pensions business. He leads a team of a dozen quantitative analysts, economists and financial engineers based in the UK. Nick's team work researching risk management capabilities including Climate & Stochastic Scenario Generation solutions.
